High Particles
(Above 500 Dalton)

Low Particles
(Below 500 Dalton)

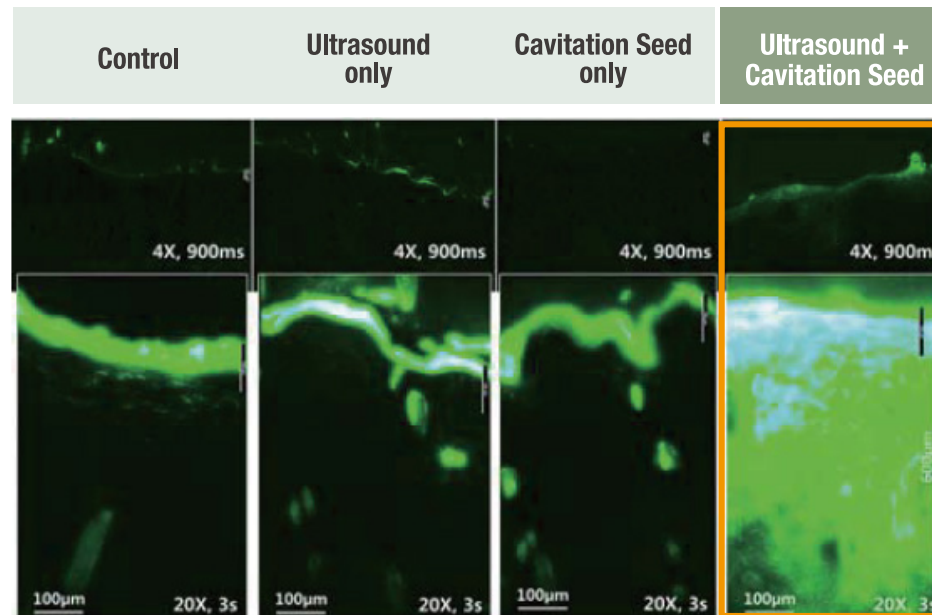

**“Active ingredients in cosmetics that disappear due to the 500 Dalton Rule*!
Not enough just to apply. Cosmetics must be absorbed into the skin.”**

*500 dalton rule is...

The size of the ingredients that can be absorbed by the skin is defined as less than 500 Daltons,
Indicating that particles larger than 500 Daltons are difficult to absorb into the skin.

DSS : Multiple Ultrasound Synergy Effect

10 SONO

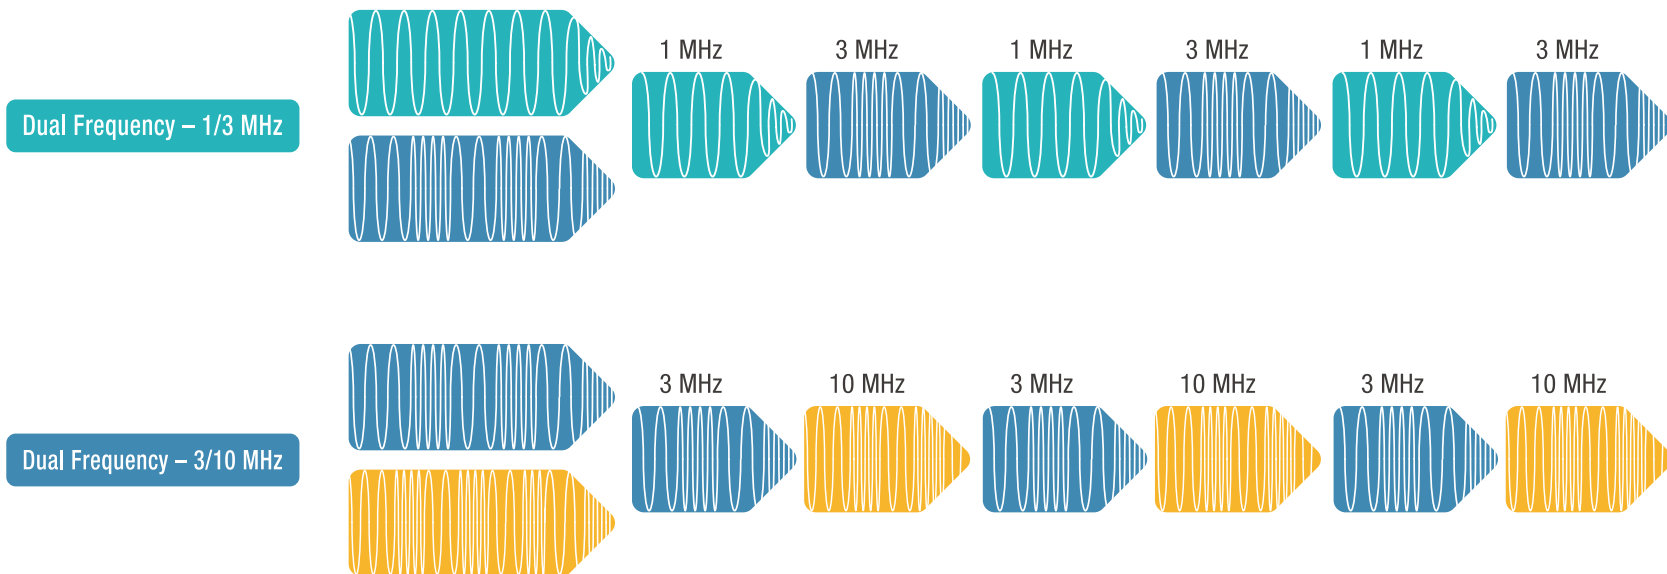

The three ultrasonic frequencies 1, 3 and 10 MHz have different depths of penetration into the skin. It delivers high-density, dynamic micro-vibrations by generating two ultrasonic waves alternately to induce the activation of the cell to promote skin elasticity, moisture and soothing effect.

DSS : Non-irritatant Ultrasound

10 SONO

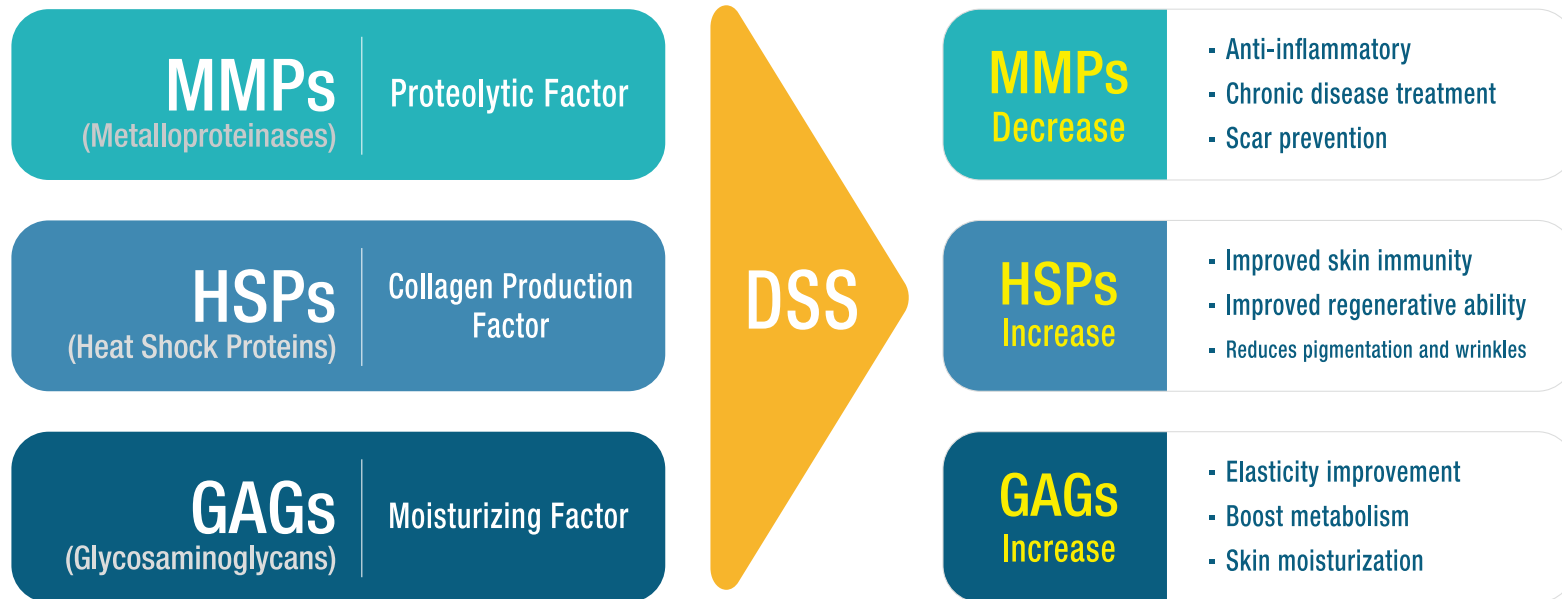

By delivering high-density vibration energy to aging cells, it naturally creates cell activation, helping to improve overall skin elasticity, moisturizing, and whitening without strong stimulation to the skin.

DSS : Multiple Ultrasound Synergy Effect

10 SONO

Helps to improve overall skin elasticity, moisturizing, and whitening without causing strong irritation to the skin.

NBS Handpiece

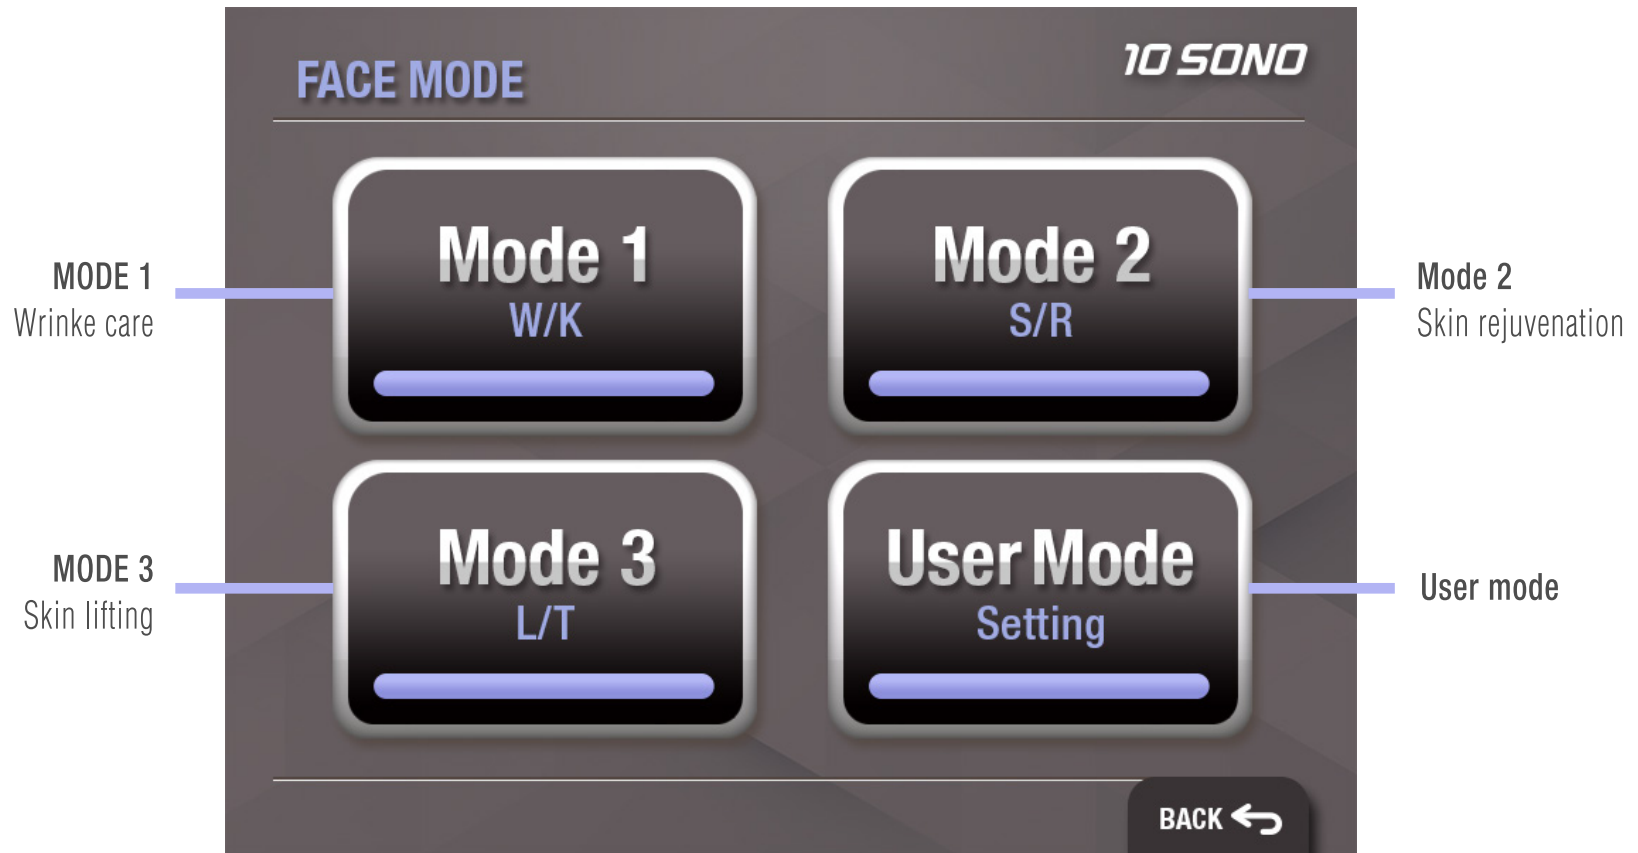

Maximizes skin absorption of cosmetic active ingredients using ultrasonic waves and ultrasonic responsive nanobubbles.

DSS Handpiece - Face / Body

Transmits high-density dynamic micro-vibrations to promote cell activity by combining three ultrasonic frequencies of 1,3 and 10MHz and increase of HA content collagen.
